**LinkedIn:** https://www.linkedin.com/in/benjamin-batres-9216b5329/
**GitHub**: https://github.com/BenjaminBatres
**Portfolio**: https://benjaminbatres.github.io/Portfolio/

Experienced software developer with half a year of expertise in frontend and full-stack development. Skilled in React, JavaScript, and Firebase, with a strong focus on creating scalable, efficient, and user-friendly applications. Dedicated to improving user experiences, optimizing performance, and driving projects to successful completion. Continuously eager to learn and implement new technologies and methodologies.

## Professional Experience

**Frontend Developer Internship** | Certificate                                            Remote | January 2025
- Completely transformed a static HTML, CSS, JavaScript, and React single-page application into an interactive user interface using animations, transitions, and carousels.
- Processed API requests to dynamically represent data from a cloud server using skeleton loading states, paginations, and dynamic routing.
- Utilized Git version controls and interface to work and thrive in a virtual and collaborative team environment.

## Projects (personal)

**Netflix Clone:** *(NextJS, TypeScript, JavaScript, Firebase)*
- Developed a Netflix clone using React and Firebase to practice building a dynamic and responsive web application. The app fetches data from the TMDb API to display movies and TV shows by category, supports user authentication, and is fully responsive. Through this project, I strengthened my skills in API integration, React Hooks, and UI design.

**E-commerce Library Website:** *(React, JavaScript, HTML, CSS)*
- Developed an e-commerce application with page routing, responsive design, lazy loading for images, and cart/checkout functionality

**Movie Search:** *(React, JavaScript, HTML, CSS)*
- Developed a website that shows any movie the user searches and has a sort selection that sorts from latest to oldest and oldest to latest.

**Youtube Clone:** *(JavaScript, React, and Material UI 5 )*
- I built and deployed a Modern YouTube clone application in React Js with Material UI 5. Consisting of stunning video sections, custom categories, channel pages, and most importantly, the ability to play the videos.

**Skinstric Project:** *(JavaScript, NextJs, CSS, and Tailwind)*
- I redesigned Skinstric.ai and made it more modern. I created this website using NextjS 14. I implemented a camera that uses artificial intelligence (AI) to scan a user's face and display their gender, age, and race.

## Technical Skills

**Programming Languages:** TypeScript, JavaScript, HTML, CSS, React, Node.js, Git, Vercel, vscode, GitHub pages
**Frameworks:** React, TailwindCSS, Firebase, NextJS, React Query, React Hook Form
**Tools & Other platforms**: Vercel, GitHub, Figma, VsCode, Jest, React Testing Libraries

## Education:

Frontend Developer BootCamp                                            Frontend Simplified, 2024

## Other

Interests: coding, camping, gaming, TV series
